Table of Contents

Go to menu

The "Go to…" menu can be used to navigate to arbitrary coordinates not bound to any geocache or geocache waypoint or to make a waypoint projection.

Technically the "Go To…" menu brings you to the waypoint tab of a c:geo internal cache. So the usage is exactly the same like for waypoints of every other cache in c:geo.

Icon	Description
	A short click on this icon will start your preferred navigation tool to navigate to the selected cache. A long press will start your secondary preferred navigation tool.
	Will open the complete list of available navigation tools
	Clicking here will open the menu of functions not fitting into the top bar on your device, thus being displayed as a list instead. The function shown in this list are also described in this table.
Caches around	Will conduct a nearby search around the given coordinates
Clear History	Will clear the history entries on the lower section of the screen.
