BOOKMARK LISTS / POCKET Queries	

## **Bookmark Lists / Pocket Queries**

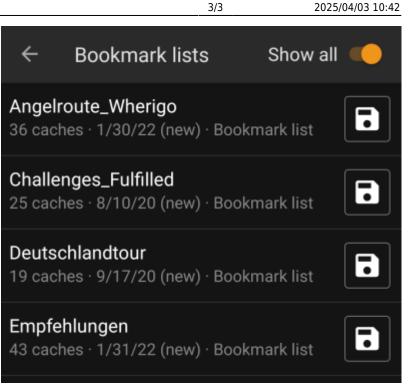

These functions allow to view the existing pocket queries or bookmark lists on the geocaching server and either show them as a list or import the whole pocket query similar to importing a GPX file.

This menu is only available for geocaching.com premium members as pocket queries and bookmark lists are a premium features.

After selecting this menu function the corresponding lists will be loaded from the server as follows:

	÷	Pocket quer	ies	Show all	
	Fehlend	der Fundmona	ıt		٩
	<b>Gran Ca</b> 791 cacl remainir	hes · Yesterday	(new) · 5 da	ys 💽	٩
	Lecker	Essen			٩
Pocket Queries:		<b>er Nähe</b> es · 2/8/22 (new e	∕) · last day	6	٩

## Bookmark lists:

The list will show each existing pocket query or bookmark list with its name as title. The subtitle provides information about how many caches are contained in each query/list. For pocket queries it will also contain the day the query was run and the remaining days the query will be available on the server.

The **b** icon can be used to import the whole pocket query / list onto one of your lists, the icon will open the pocket query /list for preview.
