# Utility programs

This function will open a screen showing apps, which might either work in conjunction with c:geo or can be used to enhance some features in c:geo. You can tap on each tool to open a web page with more information and/or download possibility.

| Logo  | Name                                       | Description  |
|---|--|--|
|    | <a href="#">Send to c:geo</a>              | Send to c:geo is a browser extension for your PC. When browsing geoaching.com, you can send caches to your smartphone with the tap of a button directly inside your browser.   |
|    | <a href="#">c:geo contacts plugin</a>      | Enables you to open a contact card (of your address book) directly from a <a href="#">log entry</a> , so you can more easily ask friends for help.   |
|   | <a href="#">Brouter Offline Navigation</a> | BRouter provides offline routing. If it is installed and has the necessary files downloaded, c:geo will automatically show a route to the cache on the normal internal <a href="#">map</a> .<br>A short guide of how brouter works together with c:geo can be found <a href="#">here</a> .   |
|  | <a href="#">Google Translator</a>          | If you download translation packages in the Google Translator app, then you can easily translate cache descriptions and log entries in c:geo by a long tap on the text (even without an internet connection).  |
|  | <a href="#">WhereYouGo</a>                 | WhereYouGo allows playing and searching geocaches of the type Wherigo. c:geo can automatically <a href="#">trigger the download of cartridges</a> within this app.   |
|  | <a href="#">GPS Status &amp; Toolbox</a>   | You can use the radar in this application in conjunction with c:geo. It also offers a lot of other GPS-related information.  |
|  | <a href="#">Bluetooth GPS</a>              | Allows to use an external GPS receiver to get more precise location data, and you can spare battery of your device.<br> Please note, that you have to disable the usage of Google Play Services in <a href="#">c:geo settings</a> to use a Bluetooth GPS. |

| Logo   | Name          | Description   |
|--|---------------|---|
|   | GPS Locker    | GPS Locker keeps GPS signal active when switching between applications and when your device's screen is off.  |
|   | Chirp Wolf    | Chirp Wolf allows you to read the data from ANT+/Garmin chirp tags, which is needed for ANT+/chirp geocaches.   |
|   | Locus         | Outdoor navigation app for your phone or tablet. View topographic maps offline, track your route, hunt geocaches, use a voice guide and do even more. |
|   | Adventure Lab | Adventure Lab Play app for your phone or tablet.  |
|  | GC Wizard     | GC Wizard contains numerous tools for simple cryptography, geodetic and scientific calculation as well as hundreds of sets of various symbols.        |
