# Utility programs

This function will open a screen showing apps, which might either work in conjunction with c:geo or can be used to enhance some features in c:geo. You can click on each tool to open a web page with more information and/or download possibility.

Logo	Name	Description
	<a href="#">Send to c:geo</a>	Send to c:geo is a browser extension for your PC. When browsing geocaching.com, you can send caches to your smartphone with the click of a button directly inside your browser.
	<a href="#">c:geo contacts plugin</a>	Enables you to open a contact card (of your address book) directly from a <a href="#">log entry</a> , so you can more easily ask friends for help.
	<a href="#">Brouter Offline Navigation</a>	BRouter provides offline routing. If it is installed and has the necessary files downloaded, c:geo will automatically show a route to the cache on the normal internal <a href="#">map</a> . A short guide of how brouter works together with c:geo can be found <a href="#">here</a> .
	<a href="#">Pocket Query Creator</a>	Allows easy creation (and download) of Pocket Queries centered on your current position or a point selected from a map. Requires a geocaching.com premium membership.
	<a href="#">Google Translator</a>	If you download translation packages in the Google Translator app, then you can easily translate cache descriptions and log entries in c:geo by a long click on the text (even without an internet connection).
	<a href="#">WhereYouGo</a>	WhereYouGo allows playing and searching geocaches of the type Wherigo. c:geo can automatically <a href="#">trigger the download of cartridges</a> within this app.
	<a href="#">GPS Status &amp; Toolbox</a>	You can use the radar in this application in conjunction with c:geo. It also offers a lot of other GPS-related information.

Logo	Name	Description
	<p>Bluetooth GPS</p>	<p>Allows to use an external GPS receiver to get more precise location data, and you can spare battery of your device.</p> <p> Please note, that you have to disable the usage of Google Play Services in <a href="#">c:geo settings</a> to use a Bluetooth GPS.</p>
	<p>GPS Locker</p>	<p>GPS Locker keeps GPS signal active when switching between applications and when your device's screen is off.</p>
	<p>Barcode Scanner</p>	<p>There are Greasemonkey scripts and websites which enable display of geo codes as bar codes. With this app, c:geo can read such geocodes directly from the screen of your computer.</p>
	<p>Locus</p>	<p>Outdoor navigation app for your phone or tablet. View topographic maps offline, track your route, hunt geocaches, use a voice guide and do even more.</p>
