Map Sources

The following map types are available in c:geo. You can change between the map types in the settings or in the menu of the map.

Name	Description
Google:Map	An online street map provided by Google.
Google:Satellite	An online satellite view map provided by Google.
OSM:Mapnik	An online street map provided by OpenStreetMap.
OSM:Offline	Offline maps rendered from map files in Mapsforge format. Instead of OSM:Offline the names of the available map file will be shown in the selection menu.

Currently c:geo does only support Google maps v1, which are not supporting rotation of the maps. Thus all maps are always displayed northbound. We are however working on implementing a newer Google maps version.
