Map Sources

The following map types are available in c:geo. You can change between the map types in the [settings](#) or in the menu of the [map](#).

Name	Description
Google:Map	An online street map provided by Google .
Google:Satellite	An online satellite view map provided by Google .
OpenStreetMap.org	An online street map provided by OpenStreetMap.org .
OpenStreetMap.de	An online street map provided by OpenStreetMap.de .
CycleOSM	An online map targeted to bicycle riding provided by CyclOSM.org .
OSM:Offline	Offline maps rendered from map files in Mapsforge format. Instead of OSM:Offline the names of the available map file will be shown in the selection menu.

Currently c:geo does only support Google maps v1, which are not supporting rotation of the maps. Thus all maps are always displayed northbound. We are however working on implementing a newer Google maps version.
