Table of Contents

Map Sources

The following map types are available in c:geo. You can change between the map types in the settings or in the menu of the map.

Name	Description
Google:Map	An online street map provided by Google.
Google:Satellite	An online satellite view map provided by Google.
OpenStreetMap.org	An online street map provided by OpenStreetMap.org.
OpenStreetMap.de	An online street map provided by OpenStreetMap.de.
CyclOSM	An online map targeted to bicycle riding provided by CyclOSM.org.
OSM:Offline	Offline maps rendered from map files in Mapsforge format. Instead of OSM:Offline the names of the available map file will be shown in the selection menu.

> Currently c:geo does only support Google maps v1, which are not supporting rotation of the maps. Thus all maps are always displayed northbound. We are however working on implementing a newer Google maps version.
