Het loggen van Geocaches

Als je een bezoek voor een geocache gaat registreren, wordt het volgende scherm weergegeven.

Bovenste balk menu

De pictogrammen die worden weergegeven in de bovenste balk en de inhoud achter de Overloop menu knop worden dynamisch gedistribueerd op basis van de apparaatresolutie en schermoriëntatie. Het is dus mogelijk dat er meer of minder items achter de menuknop kunnen worden gevonden of in plaats daarvan worden weergegeven als pictogrammen in de bovenste balk van je apparaat. \Als een menu-item wordt weergegeven als pictogram, kun je lang op het pictogram drukken om een pop-up te krijgen met de naam van de functie .

Icoon	Functie	Omschrijving
	Verzenden	Gebruik deze knop om je log online te verzenden nadat je klaar bent met het samenstellen ervan.
	Toevoegen	Hiermee kun je een toevoegen sjabloon of je handtekening toevoegen aan de log.
	Overloop menu	Als je hier klikt, wordt het menu geopend met functies die niet in de bovenste balk van je apparaat passen en worden daarom als een lijst weergegeven. De functies die in deze lijst wordt getoond, worden ook in deze tabel beschreven.

Icoon	Functie	Omschrijving
	Foto koppelen	Hiermee kun je een bestaande afbeelding selecteren of een nieuwe foto maken, die aan het logboek wordt toegevoegd.
	Smilies	Opent een lijst met smiley pictogrammen, die je kan toevoegen aan je bericht.
	Off line opslaan	Slaat je log offline op in plaats van versturen naar de geocaching server.
	Herhaal laatste log	Deze functie zal de laatste log tekst, die je gebruikt hebt in het tekstveld plaatsen.
	Trackable sorteren	Je kunt de volgorde van de lijst met trackables wijzigen door te sorteren op naam of op trackingcode.
	Wissen	Dit zal de log tekst verwijderen en het log scherm resetten.

Logging screen

Log types

Log Type	Description
Found it	<p>You have found this cache. This is the default log type when opening the logging screen.</p> <div> This log type is no longer available if you already posted a found log for the cache.</div>
Attended	This log type is available for event caches only and is used there instead of the Found it log.
Webcam photo taken	This log type is available for webcam caches only and is used there instead of the Found it log.
Will attend	This log type is available for event caches only and can be used to tell the owner, that you plan to attend the event.
Didn't find it	You did not find the cache.
Write note	Write a comment/note for this cache.
Needs Maintenance	<p>Select this log type to report, that the cache needs owner maintenance.</p> <div> This log type is no longer available for geocaching.com and some of the opencaching sites but has been replaced by the report problem function.</div>
Needs Archived	<p>Select this log type to report, that the cache should be archived.</p> <div> This log type is no longer available for geocaching.com but has been replaced by the report problem function.</div>
Maintenance Performed	This log type is only available if you are the owner of the cache and allows you to post an owner maintenance log.
Disabled	This log type is only available if you are the owner of the cache and can be used to temporarily disable your cache.
Enabled	This log type is only available if you are the owner of the cache and the cache is currently disabled. It can be used to enable the cache again.

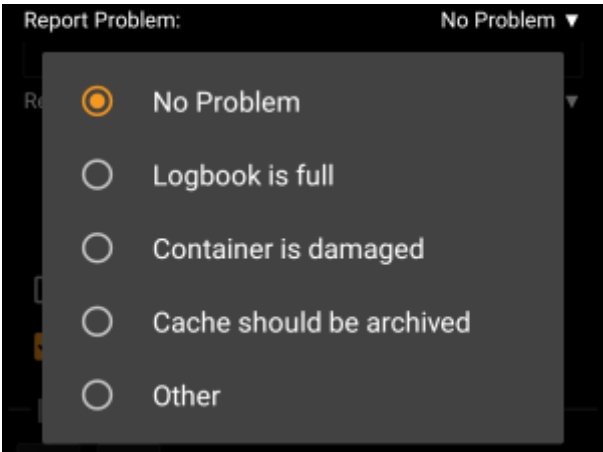

Log Type	Description
Archived	This log type is only available if you are the owner of the cache and can be used to permanently archive your cache.

Log date

By default c:geo will use the current date for the log and show Today in this field. You can however click on this field to open a calendar tool and select another date for this log.

Report problem

For caches from geocaching.com and some of the opencaching sites you can report, that the cache has a problem in parallel of logging your “Found it” or “Didn't find it” log.

Click on the field to open a drop down menu containing the available problem reports (depending on the geocaching provider, cache type, cache status and log type):

Menu item	Description
No Problem	No problem report will be attached to your log. This is the default selection.
Logbook is full	Informs the owner, that the logbook of the cache is full.
Container might be missing	Informs the owner, that the cache container is probably gone. This problem type is not available in conjunction with a “Found it” log.
Container is damaged	Informs the owner, that something is wrong with the geocache container.
Cache should be archived	Informs the reviewers/administrators of the geocaching provider, that this cache should be archived.
Other	Another problem, which you should further describe in your log text.

GCVote rating

This section is only shown if you enabled and authorized [GCVote](#) in the [settings](#). You can then use it to select the quality rating you want to give to the cache. Simply click on the stars to select a rating between 1 and 5 stars in steps of 0.5 stars. The subtitle will show you the textual equivalent of the rating you selected (e.g. "Better than average" = 3.5 stars).

The rating will be submitted when you send the log.

Favorite point

This field is only shown if you are premium member of geocaching.com. Activating the checkbox will assign a favorite point to the cache when the log is sent. The value in parenthesis shows the amount of remaining favorite points you have.

Twitter

If you connected c:geo with [Twitter](#) in the [settings](#) this field will be shown. If you enable the checkbox c:geo will post a tweet in parallel to sending this log.

Inventory

This section lists all trackable items, which are currently in your inventory. It shows the icon of the trackable type (e.g. Travelbug, Geokrety), the tracking code and the name of the trackables. You can click on any of them to see the [trackable details](#). Using the drop down menu on the right hand side, you can select the action you would like to perform with this trackable on this cache:

Menu item	Description
Do nothing	Do not perform any trackable action for this trackable when posting your log for the cache.
Visited	Let this trackable visit this cache when posting your log for the cache.
Dropped Off	This trackable will be dropped off into this cache when posting you log for the cache.

Below the trackable list there you can use the button **Change All** to select the action for all trackable items in your inventory at once.

Attach image

Selecting the menu option **Attach image** from the [top bar menu](#) will open a new screen, where you can attach a picture to your log.

Selecting Existing opens your default gallery app and lets you pick an existing image from your gallery. Selecting New opens your device camera to take a new image.

Afterwards you can write a caption and provide a description for the picture, which will be added to your picture on the cache log. You can also (optionally) select to downscale your image to different pixel sizes to reduce the data amount being transferred when posting the log with your image.

At the moment c:geo does only support attaching a single image to each log. Attaching of multiple images is not (yet) supported.
