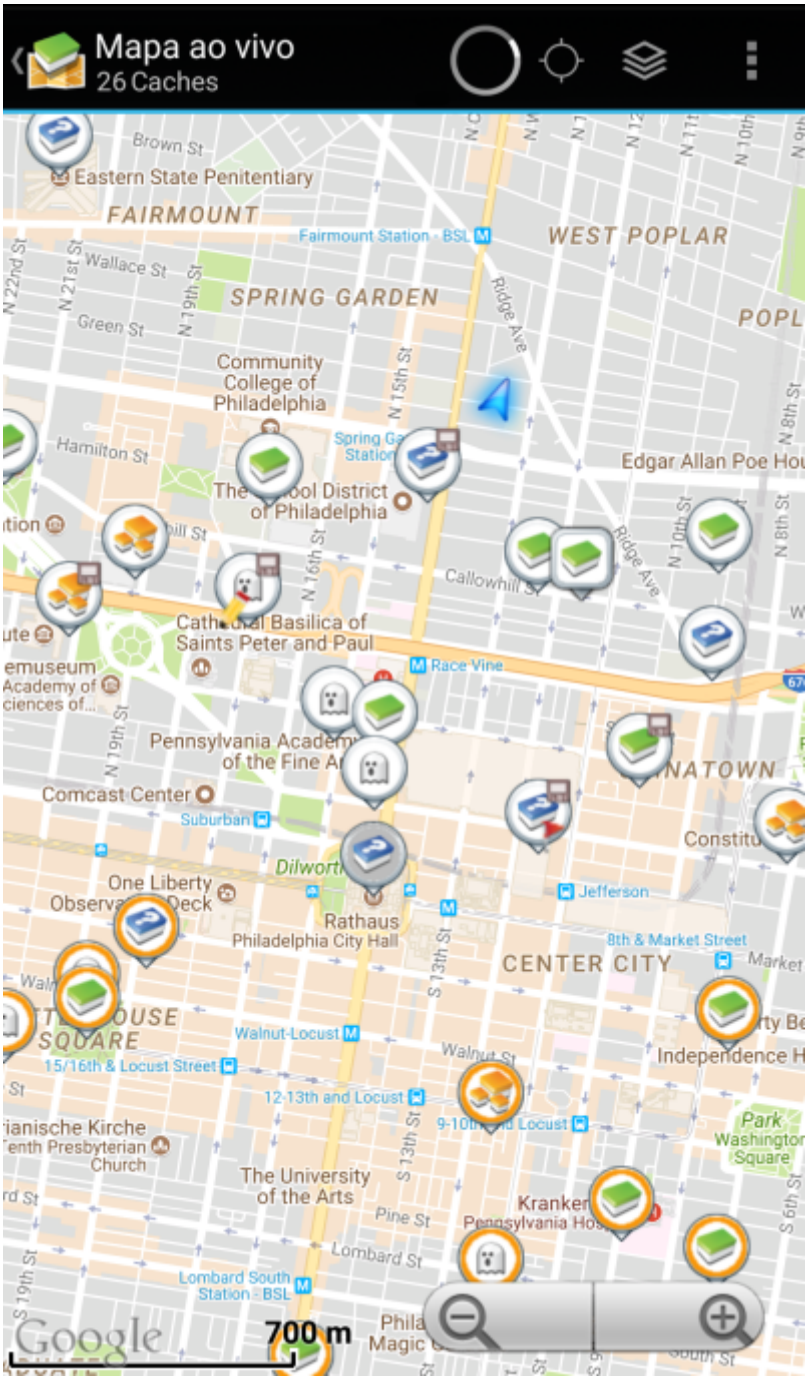
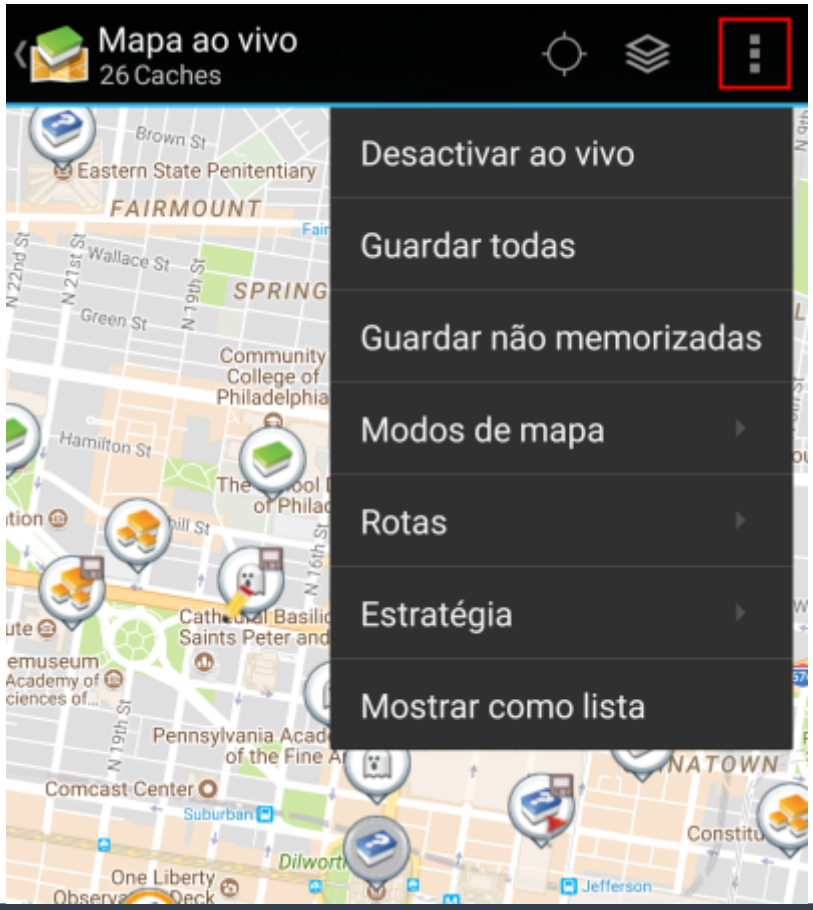
Mapa

Para facilitar o uso, enquanto estiver na vista de mapa, o seu dispositivo não vai desligar automaticamente o ecrã. Para voltar ao modo automático, para conservar energia, é necessário sair deste mesmo ecrã. No entanto, a opção de desligar e ligar manualmente o ecrã funciona de forma normal.



Menu Superior



Os ícones apresentados na barra superior e os conteúdos escondidos no menu são distribuídos de forma dinâmica com base na resolução e orientação do seu dispositivo. Devido a este facto, poderá ser possível visualizar, mais ou menos itens no menu ou como ícones na barra superior. No caso de uma função no menu ser apresentada como ícone, poderá premir durante uns segundos o mesmo para ver a sua função.

Ícone	Função	Desrição
Mapa ao vivo 26 Caches	Informação do mapa	Apresenta o estado atual do mapa:`Mapa ao vivo` no caso da opção ao vivo estar ativa, `Mapa` se essa mesma opção estiver desligada, ou o nome de uma cache/lista a ser mostrada no mapa.\\Por baixo pode visualizar o numero de caches a ser apresentadas no mapa.
	Circulo de progresso	Um indicador de progresso é apresentado quando o mapa ao vivo está a carregar informação dos servidores de geocaching e/ou da sua lista de caches. Este desaparece quando o mapa ao vivo acabar de carregar estas informações.
	Centrar posição	Este botão pode ser utilizado para centrar o mapa na sua posição atual. Se o mapa já estiver centrado na sua posição o ícone vai aparecer com o centro preenchido.
	Seleção de vista de mapa	Use this button to change the active map source
Overflow Menu Button	Clicking here will open the menu of functions not fitting into the top bar on your device, thus being displayed as a list instead. The function shown in this list are also described in this table.	
Enable/disable live	This function turns the live map update on/off	
Store all	Saves all caches shown on the map onto your stored caches list. Caches already stored will be refreshed during this process.	

	Store unsaved	Saves all caches shown on the map, except the ones already stored, onto your stored caches list.
Map settings		This will open a menu containing several options to customize the map display (e.g. hiding caches, showing circles).
Routing		This function allows to toggle between different routing preferences (e.g. straight line, car route, bike route).
Strategy		With this function you can change the strategy c:geo uses for loading data onto the livemap.
Show as list		This will display all caches shown on the map as cache list.

Map content

The map will use your selected map type and show a live view of all available caches on the displayed location.

The live map always shows a combination of caches loaded live from all your enabled geocaching services as well as caches stored in your cache lists.

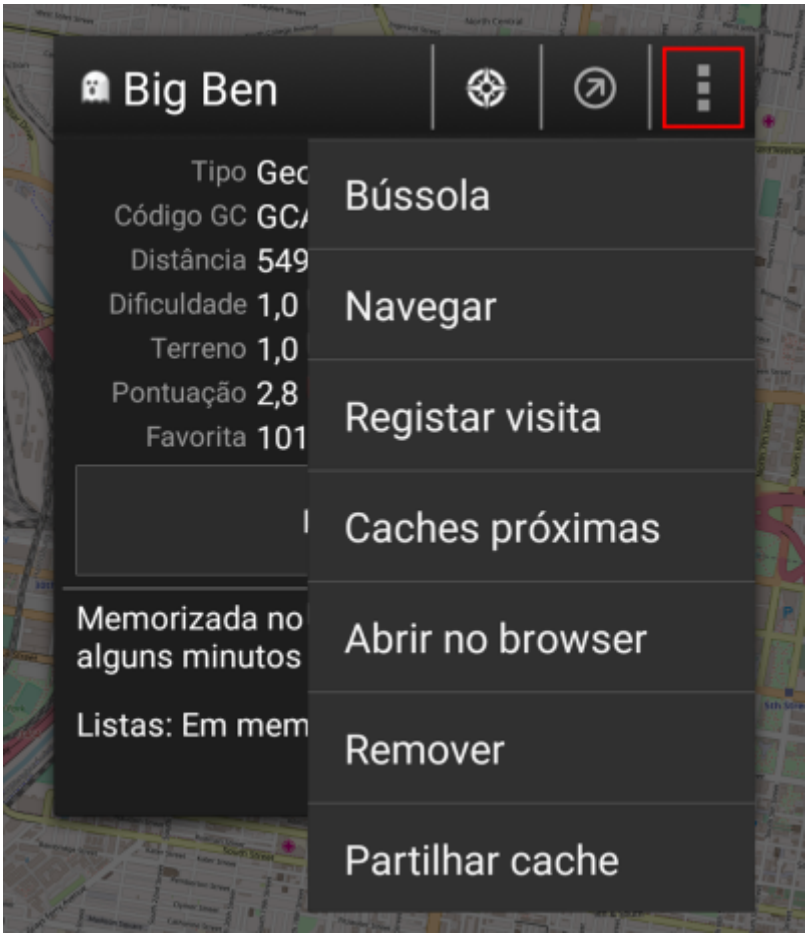
The following table describes the different marker types used on the live map.

The table will only describe the different icon types, but not the different types of Geocaches. Click on the following links to get information about the Geocache Type Icons in c:geo and Geocache marker icons in c:geo, which are used throughout c:geo.

Icon	Description
	This arrow is representing your current position and orientation on the map .
	Position of a cache from geocaching.com. The arrow points on the coordinates of this cache on the map. The icon frame will contain the corresponding cache type
	Position of a cache from geocaching.com, where the position might not be accurate due to the loading strategy restriction or the basic member limitations. The icon frame will contain the cache type c:geo identified for this cache, but the information might be wrong.
	Position of a disabled or archived cache from geocaching.com. The arrow points on the coordinates of this cache on the map. The icon frame will contain the corresponding cache type
	Position of a cache from an opencaching platform. The arrow points on the coordinates of this cache on the map. The icon frame will contain the corresponding cache type
	Position of a disabled or archived cache from an opencaching platform. The arrow points on the coordinates of this cache on the map. The icon frame will contain the corresponding cache type
	Position of a cache from another platform than geocaching.com or opencaching (e.g. extremcaching.com). The arrow points on the coordinates of this cache on the map. The icon frame will contain the corresponding cache type

Map popup window

If you click on a cache icon on the live map the following popup windows will be shown above the map, providing additional information for the selected cache:



Top section

This section of the map popup provides several menu options concerning the selected cache.

Icon/Option	Description
	Showing the Cache type icon and the title of the selected cache.
	A short click on this icon will start your default navigation tool to navigate to the selected cache. A long press will start your secondary navigation tool.
	This options turns on/off the direction line/routing between your position and the position of the selected cache. This option is currently only available on the OSM:Mapnik online map and offline maps.
	This option opens a menu list with additional options also described in this table.
Compass	This opens the compass for this cache.
Navigate	This opens the list of all available navigation tools to start one of them for this cache.
Log Visit	This opens the logging window to log the selected cache.
Caches around	This option starts a nearby search around the coordinates of the selected cache and will display the results.
Open in browser	This option opens the cache listing on the geocaching web page using your internet browser.
Remove	This option will delete the cache from your stored lists. **GITHUB → KANN WEG**
Share Cache	Will share a link to the cache using the built-in Android share options.

Cache information

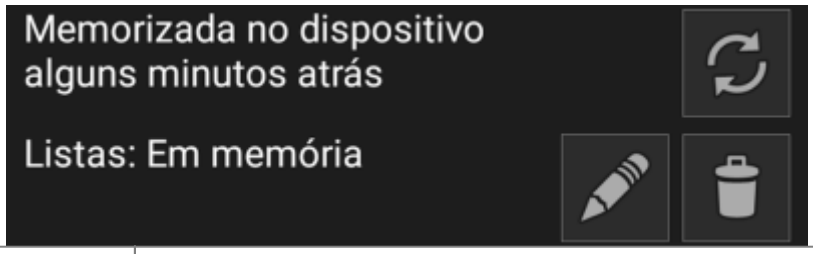
The middle section of the map popup window shows helpful information about the selected cache. Some of the information might not be shown depending on the loading status of the selected cache (e.g. due to the [livemap#strategy| loading strategy]].

Heading	Description
Type	Type of the selected cache.
Geo code	Geo code of the selected cache.
Distance	Distance to the coordinates of the selected cache from your current position.
Difficulty	Difficulty rating of the selected cache shown as decimal value as well as graphical.
Terrain	Terrain rating of the selected cache shown as decimal value as well as graphical.

Heading	Description
Rating	Shows the quality rating of this cache from GCVote if this service is enabled in the c:geo settings as decimal value as well as graphical. The value shown in parenthesis is the number of votes given for this cache.
Favorite	The amount of favorite points (geocaching.com) or recommendations (Opencaching platforms) the selected cache has been awarded.
More details	This button will take you to the cache detail page of the selected cache providing the full information for this geocache.

List managegment

This section of the map popup provides several options to manage the storage state of the selected cache.



Icon/Option	Description
Memorizada no dispositivo alguns minutos atrás	This field provides information if the selected cache is stored on your cache lists and for how long the cache is stored (i.e. gives you an indication of how up-to-date the shown details are).
	Clicking this button will refresh the cache information by updating it from the geocaching server.
Listas: Em memória	In case the selected cache is already stored in your cache lists this field shows you the list(s) it is stored in.
	This button is only shown if the selected cache is not yet stored in your cache lists and will store it. A long press on this icon will store the cache to the last used list, instead of asking for the list.
	If the selected cache is already stored in your cache lists this icon is shown and allows you to modify the list or add the cache to another list.
	If the selected cache is already stored in your cache lists this icon is shown and allows you to delete the cache from your lists.

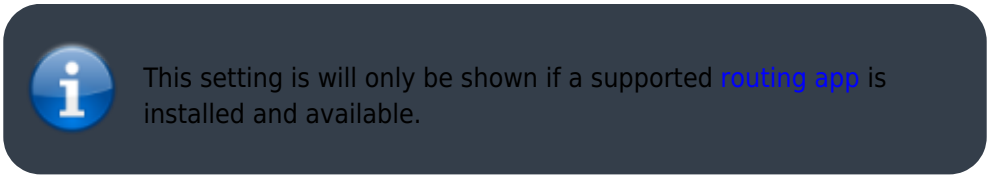
Map settings

After selecting the menu function `Map settings` the following option screen will be shown:

Option	Description
Hide own/found caches	If activated your owned and found caches are hidden on the map. This is the same option as also available in c:geo settings and changing it here will change it also permanently in your settings. Please note, that some technical limitation apply for hiding your owned and found caches as explained on the settings page
Hide disabled caches	If activated disabled caches are hidden on the map. This is the same option as also available in c:geo settings and changing it here will change it also permanently in your settings. Please note, that some technical limitation apply for hiding hidden caches as explained on the settings page
Show direction	This will enable/disable the direction line/routing shown between your position and a selected cache.
Show circles	If activated c:geo will show circles with a distance of 1/10 mile (161 meters) around all physical waypoints (i.e. traditional caches, physical stages of a cache, mystery caches with corrected coordinates). This is the minimum distance placed caches need to have on geocaching.com and these circle might be helpful when you are planning to hide a new cache and are looking for a position.
Show trail	With this option you can activate a trail showing your position history (your movement) on the map. This is the same option as also available in c:geo settings and changing it here will change it also permanently in your settings.

Routing

After selecting the menu function `Routing` the following option screen will be shown:

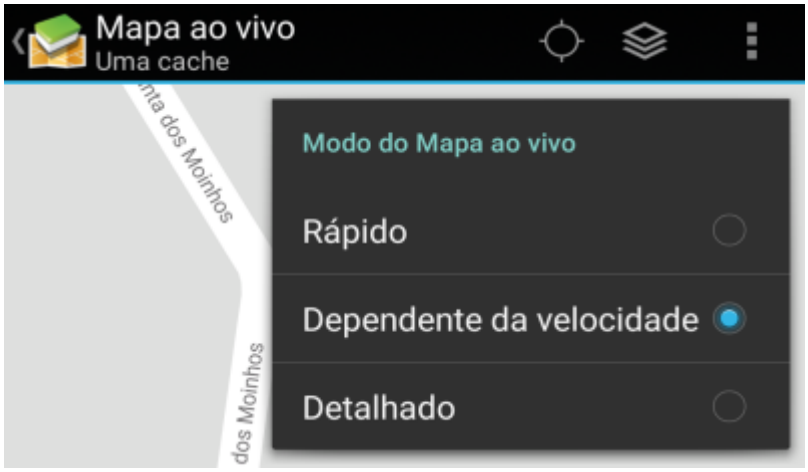


Option	Description
Straight line	This will show a direct line (air distance) between your position and the selected cache.
Walk	This will set the routing app to draw a line following turn-by-turn navigation for pedestrians.
Bicycle	This will set the routing app to draw a line following turn-by-turn navigation for bikers.

Option	Description
Car	This will set the routing app to draw a line following turn-by-turn navigation for cars.

Strategy

After selecting the menu function `Strategy` the following option screen will be shown:



These options define the mechanism the live map uses to load cache data from geocaching.com. As loading live map data from geocaching.com is quite time intensive, you can choose faster strategies.
Other geocaching services will always use the `Detailed` strategy as for those the live map loading is much faster in general.

Option	Description
Fast	Load approximated cache coordinates and tries to identify the cache type.
Detailed	Same as fast but load details for nearest 20 caches around your position.
Speed dependant	Automatic switch from `Detailed` to `Fast` above 30km/h.
